

HERO MASTERCLASS

Do you want to fast-track your NatHERS software learning experience using the HERO software tool?

Transformed in partnership with one of the industry's leading subject matter experts is offering interactive virtual classroom training.

Having a choice is essential. Currently, there is no known face-to-face NatHERS software training being offered in Australia. Ask yourself would you prefer to take the easy path with guided interactive software training or the solo path?

About the Facilitator

Matthew Graham is Principal of Graham Energy, an award-winning Sustainable Building Specialist and subject matter expert in the Nationwide House Energy Rating Scheme (NatHERS).

Matthew is a highly experienced, accredited Assessor, Teacher and Mentor in AccuRate Sustainability, BERSPro, FirstRate 5 and HERO.

He contributes to the development of the industry as a Design Matters National (DMN) Technical Assessor Support Community (TASC) and NatHERS Technical Advisory Committee (TAC) member.

Matthew aims to empower fellow accredited Assessors by bridging theory and practice with his solid understanding of the underlying Chenath simulation engine and architectural background.

About the Masterclass

Over seven 3 hour day sessions you will undertake four simple and four complex projects using the HERO software and gain a proper understanding of the Chenath simulation engine.

Some projects will be completed in their entirety. Other projects will be started ensuring critical modelling aspects are covered, with the remainder set as self-paced homework.

HERO provides a credit incentive with the masterclass (see over for details).

What our students say:

"I'd like to thank you so much for offering the Master Class hosted by Matthew Graham. What a difference the 6 sessions have made! I have learnt so much over the last 7 weeks and feel so much more confident in my modelling skills as a result. It was wonderful to learn from someone with as much experience as Matthew, especially as he is working in the field, so not only knows his way around the software like the back of his hand but is also happy to share some of his personal tips and tricks that cannot be learned from a manual".

**If you can make the time commitment
express your interest today.
Places are limited so be quick.**

Why HERO?

Hero provides the following features which makes it a more intuitive and user-friendly package.

- Assess and optimise multi-dwelling projects in one Hero file,
- Quickly calculate multi-dwelling projects with parallel simulations.
- Switch on Visual Styles to colour code a range of building element information and results.
- Hero user interface is clean and logical, facilitating fast data entry even for complex geometry.
- Transformations allow you to move, copy, mirror and rotate a vast array of building elements and dwellings.
- Hero identifies background points in vector PDF files to aid drawing speed and accuracy.
- Smart guides ensure information is aligned on each level and across multiple levels.
- Floor and ceilings adjacencies are automatically detected and split, saving time and reducing errors.
- Windows can easily be vertically or horizontally subdivided at the click of a button.
- Complex geometry is possibly using visible Special Walls - perfect for retaining walls, internal walls to roof space or clerestory walls.
- All information is dynamically highlighted and updated across all detachable viewing modes.
- The template option allows users to create, save, share and reuse a specification improving consistency.

Complete the Masterclass and HERO Software will give you \$330 HERO credit (10 x certificates)

HERO is a free software program available for download here - <https://www.hero-software.com.au/auth/register>

Intake Details

TIME: 9am to 12pm (AEST)

PRICE: \$1,950 (GST included)

DURATION: 7 x 3hr classes conducted over six weeks.

DATES: Will be confirmed subject to level of interest.

Delivery Mode - ZOOM platform.

Group Size: Limit of six – eight participants per group.

Spots are allocated on “first in” registration basis.

Course attendance is mandatory for all the allocated group sessions. If you fail to attend you spot will be forfeited, and no catch up offered.

Once the group is filled, you will be added to a waitlist for future sessions (dates to be determined).

Registration:

To book a place in the sessions please confirm by email to tony.shoebridge@transformed.com.au
